

SUMMARY

I'm a 3rd-year university student majoring in information technology with experience in Mobile Development and Web Development. During my studies, I did some projects which are highly appreciated. I also spend time learning new technologies and best practices to become a better engineer.

TECHNICAL SKILLS

- Programming Languages: Java, Javascript & Typescript, HTML/CSS
- Frameworks / Platforms: ReactNative, Laravel, ReactJS, Web API, Docker
- Databases: MySQL, MS SQL Server
- Languages: Vietnamese, English

EXPERIENCES

Mobile Developer

Chat Application

Mar. 2022 - Jun. 2022

- Built a chat application. Have features such as chat, group chat, video call, audio call, add friends, manager profile, post the story, voice search,...
- In this project I build the whole project from scratch using:
 - Java
 - Firebase for data persistent
 - Jitsi Meet for call video, call audio
- Github Repo: <https://github.com/ilyouu/java-meeting-client-server>

Mobile Developer (React Native)

Solve Math Exercises

Aug. 2022 - Sep. 2022

- Built a mobile app to solve math exercises for students from grade 1 to grade 12
- In this project I build the whole project from scratch using:
 - React Native for Frontend
 - Laravel website below to make Backend (API)
- Github Repo: <https://github.com/ilyouu/react-native-solve-math-exercises>

Web Developer (Laravel)

Solve Math Exercises

Jul. 2022 - Sep. 2022

- Built a website to solve math exercises for students from grade 1 to grade 12
- In this project I also build the whole project from scratch using:
 - MySQL for data persistent
 - Laravel for Backend, RESTful API
 - MDBootstrap for Frontend
 - Self-developed CDN system basic
- Github Repo: <https://github.com/ilyouu/laravel-solve-math-exercises>

EDUCATION

Engineering Degree - Information Technology

Vietnam - Korea University of Information and Communication Technology

2020 - Now

Da Nang city, Vietnam
